## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 8-16 have been considered but are moot in view of the new ground(s) of rejection.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 8, 11 and 14 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 2, 3, 5 and 6 of U.S. Patent Application No. 11/045,044. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. Although the

Art Unit: 2611

conflicting claims are not identical, they are not patentably distinct from each other because they are claiming common subject matters, as follows:

a) Regarding to claim 8,

a signal generator using an IIR type digital filter having multipliers in a feedback loop, wherein the signal generator comprises a control unit that changes the coefficients for the multipliers during a stable state;

the control unit sets the coefficients to predetermined values during output stopping state to stop the output signal, so that a frequency of the output signal is maintained as the output signal transitions to the stopped state.

b) Regarding to claims 11 and 14,

a signal generator using an IIR type digital filter having multipliers in a feedback loop, wherein the signal generator comprises a selector that selector and output coefficients for the multiplier during a stable state, the coefficients are selected from a plurality of set values;

the selector change the coefficients to predetermined values during an output stopping stat to stop the output signal, so that a frequency of the output signal is maintained as the output signal transitions to the stopped state.

### **Conclusion**

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2611

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
